

MCCS

PASS -THROUGH WASHER

Modular CONVEYORIZED Cleaning Systems

**The Most Complete
Line of CONTINUOUS
CLEANING SYSTEMS
on the Market!**

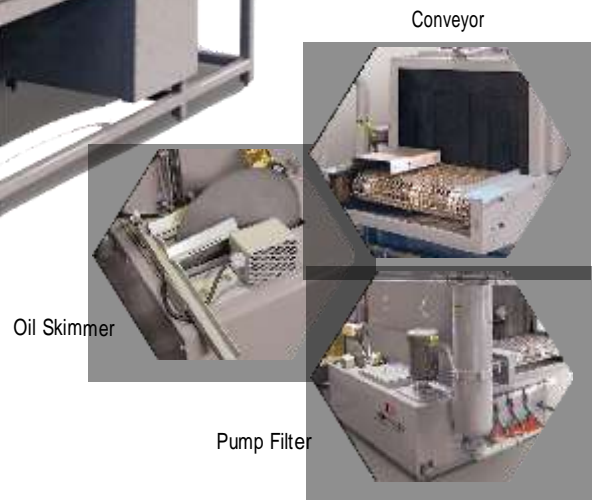

MCCS 1000

Single Stage Conveyor

Jenfab's pass-through washer is the solution to your high-volume cleaning needs. With six standard machine platforms, Jenfab can integrate washing, rinsing, passivating, applying iron phosphate, rust preventive and drying. With a fully staffed engineering department and parts testing for process validation before purchase, we can assist you in finding the right system.

Designed with today's factory in mind, the MCCS line of washers fit easily into any production line whether it is a cellular or central cleaning environment.

For those difficult projects, let Jenfab design a custom system that will be tailored to your industrial application at a competitive price.

» Belting Options

Ranging from six to 72 inches, belts include flat wire, chain, plastic, powered rollers and part fixtures.

» Oversized Tunnel Opening

With the large 24 inch wide by 15 inch high tunnel opening, a wider range of parts can be processed for more flexibility. The belt width and height can be customized for your application.

» Large Option Shelf

Each MCCS unit comes equipped with an optional shelf for easy access and maintenance of the mechanical components. Additionally, should you decide to add certain options later, there will be no modifications needed.

MCCS 3000U Custom System in a "Return To Operator" Design

Standard Features

The MCCS line of cleaning systems come equipped with the following features:

- » Vertical Pump Systems - Reliable and Efficient
- » Maintenance Friendly
- » Tank Insulation - Saves Energy
- » Electric Heat Elements
- » Industrial Controls - Lighted Switches
- » Large Lift-Off Side Access Panels
- » Heavy-Duty Drive System With Sealed Bearings
- » Option Ready Shelf - Not Sure what Options You will Need? Our Machines come Ready for Simple Plug-N-Play Option Installation Infield
- » Low Water Shut-Off - Protect Your Heat Elements from Low Water Conditions
- » 200 Gallon Tank Capacity - Maintain Long Intervals Between Machine Services
- » Stainless Steel Nozzles with Custom Header for Precision Cleaning
- » Slip Clutch-On Drive System For Safety
- » Chip Tray

Optional Equipment Available

The MCCS lines can be purchased with the following equipment to customize the systems:

- » Disc Oil Skimmer
- » Large Swing-Out Tunnel Access Doors
- » Marine Clean-Out Hatch
- » Sludge Drag-Out Conveyors
- » Propane and Natural Gas Heat
- » Custom Fixtured and Indexing Option
- » Stainless Steel Construction with All Wetted Components - SS2 Package
- » Auto Water Fill
- » Particulate Bag Filtration
- » One or Two Function Timers
- » Indexing Systems
- » Custom Sizes to Fit Customer Application
